product description:

The internal suspension is used to suspend the cable tray from the threaded rod.

The threaded rod is anchored to the hanger using an MN nut, which must be ordered separately. The dimension of the nut is chosen by the diameter of the threaded rod.

It is fastened to the sides of the cable tray using bolts NSM 6X10. It can be fastened to the bottom of the cable tray from the 200 mm width.

To protect the cables, the bolt head is inside the cable tray.

A bolt with a GMT surface finish is used for a tray with an F surface finish.

Maximum load is 90 kg.

surface finish:

S - Pre-Galvanized according to EN 10346, EN 10143, zinc-layer 15-27 µm

F - Hot Dip Galvanized according to ČSN EN ISO 1461, zinc-layer 45 µm (min. 35 µm)

meets the requirements: ČSN EN 61537:02

sales amount:

1 pc

classification 🔥:

ČSN 73 0895 P 90-R

DIN 4102-12 E 90

STN 92 0205 PS 90

Fire classification depends on the specific conditions of the cable tray, detailed in the catalog Systems with maintained functionality in fire

storage:

ČSN EN 60721-3-1

 WARNING**Risk of injury from cutting**

Although the cable trays are produced with maximum effort to minimize sharper edges, it is necessary to wear protective gloves to carry, grip and work with cable elements.

Electricity injury

As individual components of cable management systems are made of electrical conductive material, it is essential not to work with a system near live electrical parts. Infringement of the safety regulations may cause serious injury of health or death.

Safe Use

Under normal and foreseeable conditions of use, there are no risks to consumers, provided that proper installation and usage are carried out in accordance with the installation manual.
